2025 Annual Ridership Report

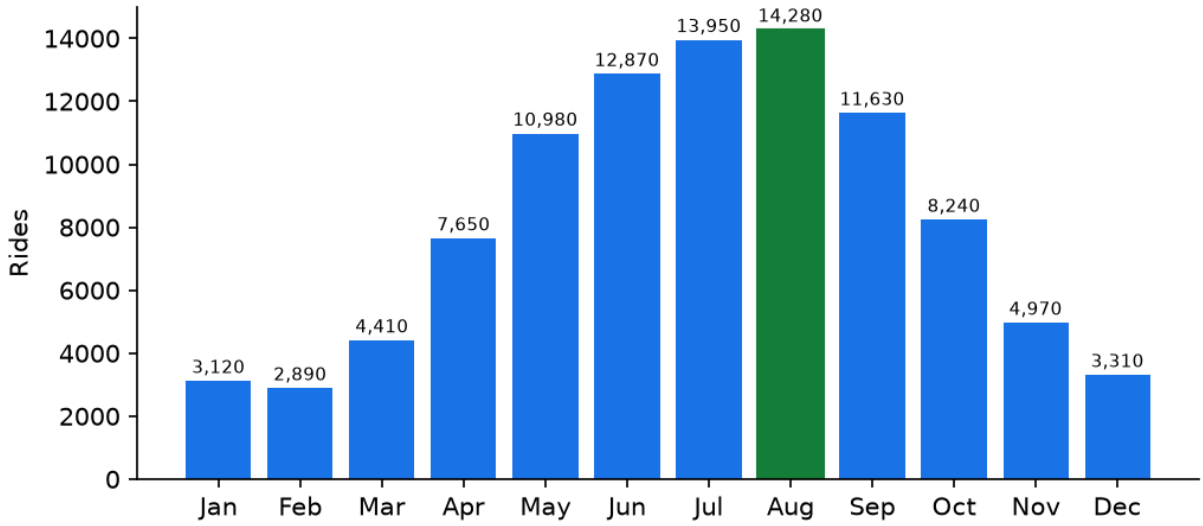

Published 10 March 2026 · Planning team

Summary

2025 was our busiest year so far. Riders took close to one hundred thousand trips, up from 71,000 in 2024. The summer months carried the year: see Figure 1 for the month by month numbers.

Growth came mostly from students and from commuters crossing the river. The two stations near campus and downtown were the busiest, as Table 1 shows. Lansingburgh grew the fastest from a small base.

Figure 1. Rides per month, 2025

Stations

We ran 22 stations at the end of 2025. Table 1 lists the six busiest, with the number of docks at each.

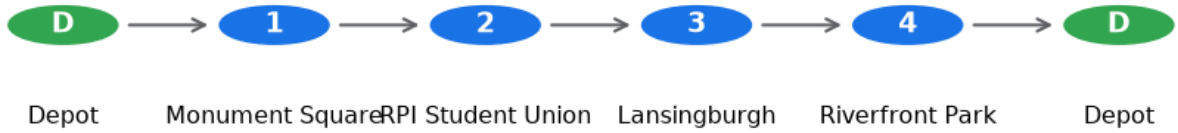

Table 1. Our six busiest stations

Station	Docks	Rides in 2025
Monument Square	24	21,400
RPI Student Union	30	19,800
Riverfront Park	18	16,950
Troy Atrium	16	11,200
Green Island Bridge	14	9,300
Lansingburgh	12	7,450

Operations

Every morning a rebalancing truck moves bikes from full stations to empty ones before the commute. Figure 2 shows the loop it drives. The route was changed in October 2025 after complaints that Lansingburgh was empty by 7 am.

What we will do in 2026

Add e-bikes at the three busiest stations, open four stations in Albany, and keep the winter service running. Winter opening hours are on the flyer posted at every station.
